

SUSTAINABILITY FUTURE GROWTH

A team of management consultants specialising in auditing, consulting, contracting, and training for risk management, security management, safety, and environmental management.

Our Capabilities

Sustainability Pty Ltd is a team of management consultants specialising in auditing, consulting, contracting, and training for risk management, security management, safety, and environmental management.

We have global experience in the development of integrated business solutions – from initial risk assessments to the integration of quality, safety, and environmental management systems for practical implementation.

We have built our reputation in the rapidly developing resources and industrial sectors of Australia and Asia, especially Indonesia, China, Mongolia, Myanmar and Kazakhstan.

Our team of consultants, advisors, and trainers assist clients:

- to achieve current leading international practices
- to identify risks and establish risk management systems
- to deliver training and business process solutions
- to review, develop, and implement effective management systems in environmental, safety, security and risk mitigation

Our head office is in Perth, Western Australia, with international offices in Mongolia, Singapore, Pakistan and Indonesia.

Our team of dedicated consultants has a proven track record working in different geographical locations, with most consultants certified by internationally-recognised institutions such as RABQSA International (USA/Australia) and the American Society for Industrial Security (ASIS).

What We Do

Security

- Lead Auditor course: Training for Lead Auditors who work on ISO 28000 (Security Management Systems for the Supply Chain) certifications
- Corporate security planning, emergency response planning, incident management planning
- Security Management Systems for the supply chain
- Development of security procedures

Training

Training Management Consulting

- Training baseline assessments and system development
- Design, delivery, management and administration of training
- Curriculum and resource development

Training products

- Lead and Internal Auditor Training– Occupational Health and Safety, Environmental, and Security Management Systems (RABQSA certified)
- NEBOSH International General Certificate (Accredited Centre 579) – Remote self-paced learning for occupational health and safety

- Risk management and assessment
- Incident analysis and investigation
- Safety leadership
- Contractor management – assessment, compliances, improvement plans

Environmental Management

- Environmental management systems
- Environmental and social impact assessments
- Environmental audits and certifications
- International cyanide management code auditing
- Mine closure and restoration
- Due diligence and compliance assessments

Selected Clients and Projects

Security planning

Mitchell Corp, Newcrest Australia

Sustainability helped Mitchell Corp develop a corporate security plan, emergency response plan, and incident management plan.

Security Management Plans

Newcrest Ltd, Australia

Development and implementation of a security management plan

Development of security procedures

Tiwest, Australia

Sustainability provided security for Tiwest during site shutdown procedures, and provides Emergency Safety Officers as required. We have helped Tiwest: implement security procedures and asset protection and loss prevention techniques; collate emergency response information; write standard operating procedures; and conduct training and exercises for the Emergency Response Team.

Training for Lead and Internal Auditors

BHP Billiton, Australia

Development of an Internal Auditor Training program

Marine and Offshore, Kazakhstan

Provision of training and assessment material for Lead Auditor course

ASIS International

Conducting ISO 28000 (Security Management Systems for the Supply Chain) course for the American Society for Industrial Security (ASIS)

Mitchell Corp Logistics, Australia

Security Lead Auditor and internal auditor for dangerous good transportation processes

Main Roads Western Australia, Australia

Provision of training and assessment material for Lead Auditor course

Development of specialist auditing products and training

Newmont, Sumbawa Indonesia

Sustainability assisted Newmont to develop specialist auditing products which would assess performance in geotechnical management, supply chain of dangerous goods, and EHS. Training of the auditors following the RABQSA-accredited course materials was provided to establish a team of internal auditors. Newmont also engaged Sustainability to undertake a certification audit of their integrated environmental, and health and safety management system for their Asia and Pacific operations.

Major hazard review and development of improvement plan

Weda Bay Nickel, Halmahera Indonesia

Sustainability completed a major hazard review for Weda Bay's exploration and support operations in remote areas of Halmahera. The review included a workplace assessment, workshop, and development of risk assessment procedures. Mitigating measures and an improvement plan involving key site personnel were defined to ensure accountability and implementation by site personnel.
