

ENVIRONMENT AND COMMUNITY POLICY

Sustainability recognises and embraces the integration of environmental performance into all aspects of the business.

We conduct all activities in a responsible manner, respect the environment and community, and comply with all statutory environmental laws and regulations and community expectations.

Our commitments are supported through a management system that incorporates both environmental and community objectives, due diligence and continual improvement.

Sustainability's Environmental objectives are set annually at the inaugural Management Meeting, formalized in the company's Business Plan.

Tony Webster
